shahbaz@ab-Latitude-E5470:~$ uname -a
Linux ab-Latitude-E5470 6.14.0-37-generic #37~24.04.1-Ubuntu SMP
shahbaz@ab-Latitude-E5470:~$
```

Explanation :

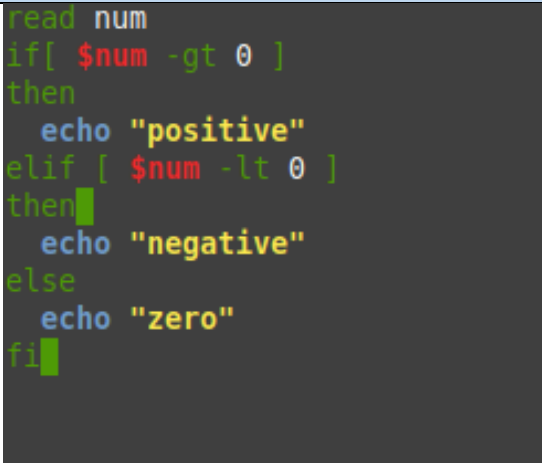

In this task, basic Linux commands such as pwd, ls -l, whoami, date, cal, and uname -a were used. These commands display information about the current directory, user, date, calendar, files, and system.

Task 2:	
Code:	
Screenshot:	 <pre> shahbaz@ab-Latitude-E5470:~\$ mkdir lab1 shahbaz@ab-Latitude-E5470:~\$ cd lab1 shahbaz@ab-Latitude-E5470:~/lab1\$ touch file1.txt shahbaz@ab-Latitude-E5470:~/lab1\$ cp file1.txt file2.txt shahbaz@ab-Latitude-E5470:~/lab1\$ mv file2.txt newfile.txt shahbaz@ab-Latitude-E5470:~/lab1\$ rm file.txt newfile.txt rm: cannot remove 'file.txt': No such file or directory shahbaz@ab-Latitude-E5470:~/lab1\$ rm file1.txt newfile.txt rm: cannot remove 'newfile.txt': No such file or directory shahbaz@ab-Latitude-E5470:~/lab1\$ cd .. shahbaz@ab-Latitude-E5470:~\$ rmdir lab1 shahbaz@ab-Latitude-E5470:~\$ </pre>
Explanation :	In this task, a directory and files were created, copied, renamed, and deleted using Linux commands. This demonstrates basic file and directory management.

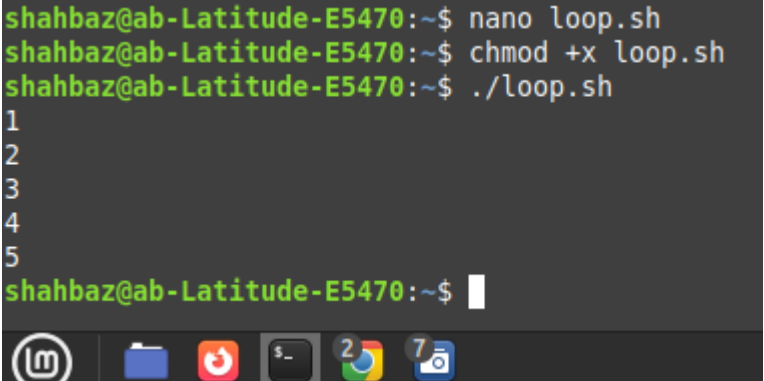

Task 3:	
Code:	 <pre> shahbaz@ab-Latitude-E5470:~\$ nano script.sh shahbaz@ab-Latitude-E5470:~\$ chmod +x script.sh shahbaz@ab-Latitude-E5470:~\$./script.sh read first number 10 read second number :22 ./script.sh: line 4: sum=32: command not found shahbaz@ab-Latitude-E5470:~\$ </pre>
Screenshot:	

Explanation :	A simple shell script was created to take two numbers using read and calculate their sum. The script was made executable using chmod and then executed.
----------------------	---

Task 4:

Code:	<pre> read num if[\$num -gt 0] then echo "positive" elif [\$num -lt 0] then echo "negative" else echo "zero" fi </pre>
Screenshot:	
Explanation :	A shell script was created using if-elif-else to check the entered number. It displays whether the number is positive, negative, or zero.

Task 5:

Code:	<pre> for i in 1 2 3 4 5 do echo \$i done greet(){ echo "hello \$1" } </pre>
Screenshot:	 <pre> shahbaz@ab-Latitude-E5470:~\$ nano loop.sh shahbaz@ab-Latitude-E5470:~\$ chmod +x loop.sh shahbaz@ab-Latitude-E5470:~\$./loop.sh 1 2 3 4 5 shahbaz@ab-Latitude-E5470:~\$ </pre>
Explanation :	A shell script was created using a for loop to print numbers from 1 to 5. A greet() function was also used to accept a name and display a greeting.

NOTE: Sir I have performed all the tasks on shahbaz persoal laptop thats why his name is showed everywhere and this is not cheating.
